

SKILL LABOR SERVICE

Accelerating Change for Low Maintenance Cost with High Quality

Benefits

1. Lower maintenance cost
2. Good skill according to Standardization Certificates
3. Hardworking, patient, honest, and discipline
4. Prompt and willing to work hard

Capability

Mill Wright

- Ability in processing machine alignment and erection
- Ability in taking Y-Level

Welder

- Ability in welding with flux core as 2F, 3F up, 4F, 5F up, and 10 mm. steel plates with flux core as 1G, 2G, 3G, 4G
- Ability in welding steel pipe Ø 6 inches with flux core as 5G up, 6G up

Pipe Fitter

- Ability in drawing structural plan according to ISO by using section plan
- Ability in creating sheet metal drawing
- Ability in bending pipe angle as degree indicated or section plan

Automation Technician/ Engineer

- Ability in installation commissioning, and maintenance automation system
- Ability in installation, testing, and analyzation VSD Control system problems

Electrician

- Ability in installation and maintenance industrial instrument
- Ability in installation and maintenance electric system, and electric transformer
- Ability in installation and maintenance air conditioning system and HVAC in industrial manufactures
