

Portable Machine Service

**“When a piece of equipment is too big to move to a shop for repair,
what we do is make a portable tool to fix the machine onsite”**

12 Years “Quality & Service”

West Coast Engineering Co., Ltd. provides onsite repairing services for industrial manufactures such a drilling rigs, caterpillars, trailers and others. We have been offering our professional machine repairing services for more than 12 years, so you can count on us.

More Information:

Mr. Krit, Product Manager E-mail: Kritp@wce.co.th

Portable Machining helps you saving:

- No transportation cost.
- Low downtime cost during shut down period.
- No dismantling – assembling of the component to repair.
- No need to resort to other machine tools or working operations control.
- No structural or performance modifications.
- Reduces labors costs and reduces repair time by up to 85%

We engineer your success
