

Pump Repair

REPAIR AND OVERHAUL MECHANICAL PART

More than 10 years of experience, West Coast Engineering Co., Ltd. has been providing our world-class engineering services for customers through out the country and also abroad. By our skillful and experienced experts, we're promptly being at your service.

Low Pressure Pump

Scope of Work:

- Vertical Pump (Water Pump)
- Centrifugal Pump "KSB" (Water Pump)
- Schwartz Pump (Grease Pump)

CENTRIFUGAL PUMP "KSB"

SCHWARTZ PUMP

Capability:

1. Provide replacement parts for all types of pump parts
2. Analysis damaged, and repair those parts
3. Disassembly and reassembly with our high technology
4. Run by experienced technicians and qualified specialists
5. Systematically plan and quality assure by special engineers

High Pressure Pump

Specification Machine Test:

For Descaling Pump

- Speed 4,300 Rpm
- Pressure 200 Bar
- Temperature 40 °C – 50 °C

For Piston Pump

- Pressure 300 bar
- Speed (Max. 1,500 Rpm)
- Motor 110 KW.
- Temperature 80 °C- 90 °C

Capability:

1. Provide repairing services for all malfunctioned high pressure pumps
2. Operated by special engineers and technicians
3. Quality control and assurance after repaired by test result (Ref. part standard)

PISTON PUMP

A4VSO PUMP

DESCALING PUMP
