## Quality Policy

*“ The Company is committed to conducting its business with advanced technology and engineering that respond to the needs of the industrial and government sectors, in order to create value throughout the supply chain. ”*

In order to achieve this Quality Policy, the Company will:

1. Establish quality targets to serve as guidelines for operation and performance evaluation.
2. Focus on creating customer satisfaction and responding to customer needs.
3. Manage the delivery of services to meet quality standards, in compliance with the relevant requirements, laws and regulations.
4. Set fair and competitive prices for products and services.
5. Deliver products and services on time.
6. Continuously develop the capabilities of personnel at every level.
7. Promote the enhancement of the quality of products and services through new technologies and innovations.
8. Provide for continual management review and improvement of the quality system.
9. Provide for the review of the quality policy and targets to ensure their suitability for the Company's operations and the economic conditions.

This Quality Policy is communicated to all employees and relevant parties so as to build awareness of, and commitment to, the continuous improvement and relentless development of their capabilities.

Issued on 1 April 2026

( Mr. Kittisak Mapanao )

Managing Director

***We engineer your success***
